DETAILED ACTION

Election/Restrictions

In view of the applicant's arguments filed 10/14/09, the election/restriction requirement filed 10/1/09 has been withdrawn. Claims 1-15 are pending and now under examination.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 thru 6, 9, and 13 thru 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Czubytyj et al. 5,825,046. Czubytyj discloses (see, for example, FIG. - 1) a memory element comprising a composite memory material (layer of a phase change material) 36. In claim 2, Czubytyj discloses the memory material being made of Te, Ge, Sb and other mixtures. In column 14, lines 23-34, Czubytyj discloses a dynamic range of resistances wherein multiple bits of binary information to be stored in a single memory cell, i.e. n bits of binary information.

Regarding claim 2, see, for example, FIG -4 wherein Czubytyj discloses an addressing matrix 52 including signal generating means.

Regarding claim 3, see, for example, FIG -3 wherein Czubytyj discloses programmable resistance elements 30 parallel to each other.

Art Unit: 2815

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7, 8, 10 thru 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Czubytyj et al. '046. Czubytyj does not disclose a minimum detectable relative resistance difference, a ratio of the further resistance over a minimum resistance of the layer of the phase change material satisfying $k/[(1+k)(N-1)] > (dR/R)_{\min}$, and contact resistance of the further resistor, and composition of the phase change material in c. It would have been obvious to one of ordinary skill in the art at the time of invention was made to use this range for the resistance and phase change material, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or working ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.
